FIG. 12

FIG. 13

A dark, high-contrast, black and white image showing a dense, textured surface, possibly a book cover or a heavily scratched film. The texture is grainy and uneven, with many small white specks and scratches visible against the dark background.

FIG. 14

This is a high-contrast, black and white image showing a dense, textured surface. The texture appears granular and uneven, with many small, bright white specks and fibers scattered across a dark, almost black background. The overall effect is one of extreme contrast and detail, suggesting a microscopic view or a close-up of a rough material. The image is framed by a thick black border.

FIG. 15

Figure 16. RT-PCR results demonstrating differentiation of multiple somatic cell types in differentiating PPSCs. Brachy: Brachyury (T) protein, MYH2: Skeletal myosin Heavy Polypeptide 2, Enolase: Human neuron-specific Enolase 2, SHH: Human homolog of Sonic Hedgehog.
